Automatic webbing retractable lifeline *scorpion*

Inexpensive alternative for single energy absorbing lanyards!

Tested over sharp edges

This product passed the "sharp edge" test, thus ensuring your safety. Incorporating an energy absorber to ensure your impact force never exceeds 6kN.

■ *Miller by Sperian* automatic webbing retractable lifelines feature a quick action brake system that arrests the fall within centimeters.

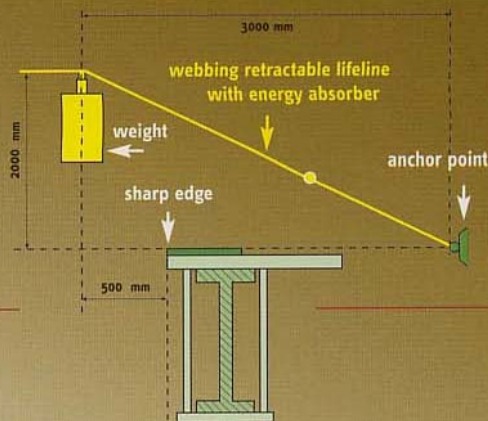

■ Compact and light, these sharp edge tested retractable lifelines must be attached to the rear D with the energy absorber attached to the harness for use when working near edges.

■ Extremely solid and light, the Scorpion automatic webbing retractable lifelines contain internal components that are corrosion resistant, comprising an aluminum and stainless steel casing, and a shock-resistant thermoplastic housing (*weight: 1,760 kg*)

Sharp edge test with 2 m fall

(sharp edge $r \geq 0,5\text{mm}$)

Available in 3 models

Ref.	Length (m)	Top connector	Connector / bottom
