

RGL5

SINGLE LEG WEBBING RESTRAINT LANYARD

RGL5

The restraint lanyard can only be used for work restraint because there is no shock absorption built into the system.

If there is any possibility of a fall, then a fall arrest product should be used. It should never be used to extend another fall arrest product.

We use 32kN polyester webbing to manufacture this product which helps give the product a longer life. It is also treated with a water repellent coating which also extends the life of this product.

EN 354:2010

Material:	26mm RIDGE Protect anti-bacterial polyester*
Fittings:	Supplied without connectors unless stated otherwise
