

# RGL8

## TWIN LEG ROPE LANYARD & SHOCK ABSORBER

### RGL8

This twin leg lanyard is produced using 11mm kernmantle rope with machine stitched connection eyes at each end.

An industry standard, and usually the minimum equipment issued/ required with a harness for anyone working at height.

The extra leg allows progression between anchor points by means of double clipping, and also optimum safety by ensuring the user is always connected.

The shock absorber pack will deploy in the event of a fall limiting the impact force on the user.

#### EN 355:2002
