

SPARK RESISTANT AIR HOISTS

Spark Resistant Hoists & Trolleys

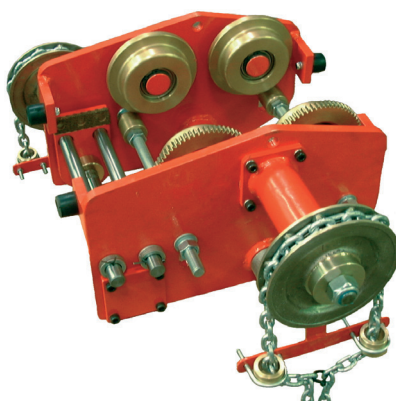

Red Rooster supply spark proofed versions of all their "Compact" and "Large Capacity" air hoists together with their entire range of air hoist trolleys.

In production and storage operations, inflammable gases, vapours and mist combined with air, may form an explosive atmosphere. Such gases and vapours are classified under European legislation. Red Rooster "spark resistant" hoists are suitable for use in ATEX Cat 2 and CENELEC Zone 1 & 2 classified areas.

Our spark resistant hoists are used extensively in the offshore, onshore, petrochemical, mining, chemical and pharmaceutical industries.

OPTIONS

- Copper plated sprockets
- Marine paint
- Stainless steel hooks
- Nickel plated hooks for food industry

PNEUMATIC HOISTS

Spark Resistant Air Hoists
