

Applications

Lifting of round or square bars, tubes, and various small profiles individually or in hooped bundles.

Description

These accessories are fitted with an open position locking system allowing to lay down the load without any intervention on the clamp.

Functioning

Place the clamp locked open over the load. Lift up the lever and hold it in the up position while starting off the lift to prevent it from locking again against the fastening screw. When laying down, the clamp automatically locks itself open.

Particular instructions

- Use in pairs with a lifting beam recommended.
- Vertical traction only.
- When lifting bundles, ensure each piece is correctly secured by the clamps.
- Working temperature: -20° to +100°C.

fiche technique	RT semi-automatic round bar & pipe clamps	ref. : T 6031 GB rev. : 2 date : Jun. 03 page : 2 / 2
----------------------------------	--	--

General characteristics

- Manufacture without load bearing welds.
- Hot epoxy coating.
- Safety factor: 4 in accordance with the European Materials Handling Federation (1998FEM 3rd edition) ; working group A5 and lifting speed 60 m/ mn.
