

RGA16 Nylon Rope for RGA10

Accredited to: EN 353-2 (only when used with RGA10)

Material: 16mm 3 strand Nylon

Fittings: N/A

Weight: 0.2 Kg Per metre

Features: Double spliced eye

MBS Nom 40kN

The RGA 16E is supplied in three standard lengths: **10 M**
20 M
30 M

However custom lengths can be made up to suit the client's application. The RGA16E is used in conjunction with the **RGA10** rope grab to provide vertical, or near vertical fall protection. The RGA16E is fitted with a **spliced eye on both ends** and is fitted with nylon thimbles. This makes the rope reversible and will extend the usage of the product

The hawser laid construction of the nylon rope, provides good shock absorption qualities and offers some resistance to alkali, oils and organic solvents.

(For details of daily inspection procedures, see the info sheet)
