

EMERGENCY RESCUE SLING

Product use

Used by many leading rescue services around the world, this extremely comfortable and easy-to-use rescue sling is based on a helicopter sling with several important features: the chest strap can be undone and fitted around the casualty while remaining attached to the rescue system. Adjustable leg straps allow any angle of casualty lift.

9mm cell foam padding on the chest strap enhances comfort for the casualty. 2 additional attachment rings regulate the size for smaller casualties.

Technical description

Padding
9mm cell foam

Weight
1.9kg

Standard
EN1497
