stretcher and is widely used by fire & rescue Services.

It folds for ease of storage and is supplied with casualty lifting and securing straps and stretcher bag. Skis are also supplied for transporting a casualty over snow.

Weight: 13.74kg. Lifting Strap: 1.4kg.

ALPHIN M.R.

CODE 13601

The Alphin MR is half the weight of most Mountain Rescue stretchers. Its advanced shape makes for easy handling. It is designed primarily for long carries but is also used extensively for cliff rescue work. It splits and folds, with a skid pan for sledging and casualty back protection. Supplied complete with all straps, handles and storage bag.

Weights:

Stretcher: 15.02kg.

Lifting straps: 1.54kg.

Handles: 3.42kg.

EVAC BODY SPLINT

CODE 13605

The Troll Evac Body Splint was designed for confined space rescue. The polypropylene bed is flexible when laid flat but becomes rigid when wrapped around the casualty. It can lift vertically or horizontally.

Weight: 5.48kg.

ALPHIN BASKET

CODE 13604

This stretcher was specially designed for a leading helicopter manufacturer for air sea rescue work. Its advanced shape aids handling: the Alphin splits and folds for easy carrying and storage.

CASUALTY WRAP

CODE 100RW

A simple and effective method of casualty protection. The wrap has a proofed nylon outer and fibre pile lining. Supplied with storage bag.

Weight: 1.90kg.
