20mtr line 4.0kg

Features: Supplied with 2 RGK26 attachment slings and 2 RGK3 karabiners Can be rigged in a matter of minutes

Sizes: Available in 2 sizes 10mtr and 20mtr

The RGHL1 is a simple to install horizontal webbing safety line, incorporating a ratchet tensioner. For restraint purposes, the RGHL1 safety line can be used in conjunction with fixed length or adjustable restraint and fall arrest lanyards.

The assembly is supplied in its own bag complete with shoulder strap, enabling the user to carry it to site with little effort. Once fitted, the bag remains fixed and can be used for storing surplus webbing.

Please ask about training for this item and our other courses.
