

RGH31 Economy Single Point Harness

Accredited To:EN 361

Web Material:45mm Water repellent polyester,

Fittings: High Tensile Steel alloy

Weight: 1.2kgs

Features: Economic Harness but still using our high spec designs.

This is another single point entry level harness developed for the user who requires a harness for a possible one off use or that the environment is particularly harsh requiring the harness to be replaced on a more frequent basis.

This harness does not have fall indicators and uses a more economic connection system.

Still manufactured to our extremely high standards for both quality and testing.

The harness has adjustment on the shoulder straps and the leg straps.
