

RGK30 Winch Bag for the RGR7

Suitability: RGR7 50 m Winch Bag

Material: Abrasion resistant nylon

Ridgegear's heavy duty Winch bag has been developed to give a safe storage for our popular man riding winch.

Due to the weight of the winch the bag comes with a special wooden internal base which spreads the load across the bottom of the bag.

The zip has been angled diagonally to give good access and ease of mounting onto the wooden base.

The wooden base also help movement of the winch when it is being transported.
