Définition

The elastic lanyards LSEA are lanyards formed by a strap made of rigid polyester fiber woven on an elastic fiber core.

These elastic fiber has elongation properties which allow the lanyard to stretch by one-third of its contracted length.

The outer strap made of polyester fibers woven on the elastic fiber core gives the elastic lanyards (LSE and LSEA) excellent resistance to abrasion and cutting when it comes into contact with a sharp edge, including in the event of a fall.

With respect to standard lanyards, the elastic lanyards LSEA provide the advantage of being more compact and therefore more comfortable in use. With respect to the elastic lanyards currently on the market, formed by a tubular strap with an elastic material inside the lanyard, the Tractel elastic lanyards LSEA provide a much higher degree of resistance to ageing (the strap keeps its elasticity much longer) and has a much more attractive design. The LSEA elastic lanyard complies with the requirements of standard EN 355.

Description.

The LSEA lanyard is formed by:

A 35mm-wide strap made of rigid polyester fibers woven on an elastic fiber core, with a capacity to elongate the length of the strap by one-third of its contracted length. The specific weaving of the polyester fiber protects the strap against abrasion and cutting during a fall.

A tear-type energy absorber formed by a tear-type absorber strap and a 45mm blue polyester safety strap. The safety strap provides a backup in the event of a fall, taking up the load after the tear-type absorber strap has reached its maximum elongation.

The LSEA lanyards can be supplied in stretched lengths of 1.50 m - 1.75 m - 2.00 m.

The LSE and LSEA lanyards can be equipped at their ends with the following connectors: M106 M11 – M12 – M13 – M15 – M40 – M41 – M42 – M51 – M52 - M53 – M54 – M56 – M60.

Technical characteristics

- 35mm-wide strap made of woven rigid polyester fibers on an elastic fiber core.
- Polyester stitching.
- Heat-shrinkable polyethylene sheath.
- 45 mm energy absorber strap, 600 kg polyester.
- 45 mm safety strap, polyester.
- Connectors made of aluminum alloy or zinc-plated, dichromate steel.
