

RGL5R

SINGLE LEG ROPE RESTRAINT LANYARD RGL5R

The RGL5R can only be used for fall restraint as there is no shock absorption built into the system. If there is any possibility of a fall, then a fall arrest product **MUST** be used.

We use 11mm kernmantle rope in the manufacture of this product which provides greater strength and superior wear resistance compared to webbing. The RGL5R should **NEVER** be used to extend another fall arrest product.

EN 354:2010

Material:	11mm kernmantle nylon rope
Fittings:	17mm steel screwgate karabiner (RGK1) Any other compatible EN 362 connectors
